"World's Leading Trade Fair for Laboratory Technology, Analysis, Biotechnology and Analytica Conference"

For more than five decades, the world's leading trade fair analytica has been your guarantee of success for the successful presentation of innovative laboratory technology and pioneering biotechnology. As the most important meeting place for the sector, it brings together the complete range of topics for laboratories in industry and research.

Five exhibition halls full of know-how: analytica presents innovative products, systems, components and applications that cover the entire value chain for laboratories in industry and research. This is the place to find the right solution to meet your needs.
