MAWEV

Ausstellung – St. Pölten, Österreich

Bearbeitet von am 30. Nov. 2023

"International Construction Machinery & Construction Vehicle Demonstration Show"

A successful concept with which the MAWEV show, which has been held every three years since 1991, has been able to inspire more and more trade visitors each time with an increasing number of exhibitors. True to the motto "Demonstration instead of pure presentation", no stone will be left unturned in 2024. Numerous construction machines, construction equipment and construction vehicles will be shown in realistic use - after all, everything has to be put through its paces.

A separate area focuses on trucks. Here, everything revolves around these weighty commercial vehicles. Trucks can be tested by trade visitors under realistic conditions on a special test track.
