

30. Apr. - 1. Mai 2024

Ceramics Expo

Konferenz & Ausstellung – Novi (MI), Vereinigte Staaten

Bearbeitet von am 5. Dez. 2023

"The Manufacturing Tradeshow for Ceramic Materials and Technologies "

The exceptional properties of advanced ceramics are leveraged for specific functionalities across high-performance industries, including electronics, semiconductors, medical devices, aerospace & defense, EV & battery manufacturing, and general industrial applications.

Join us as professionals gather to understand how technical ceramics can be used to level up their application. We're here to provide you with the ultimate opportunity to discover cross-sector solutions, from automotive to aerospace, electronics to energy and more! Build your network and experience 2 days of thought-provoking and innovative content as you walk away with long lasting relationships and a clear understanding of the latest trends.
