"The 31st International Processing and Packaging Exhibition for Asia"

ProPak Asia is Asia's Number One international trade event for Processing & Packaging Technology. ProPak Asia truly is the "Must-Attend" industry event in Asia for Asia, as quality and variety of products increase and expand, and productivity of operations and manufacturing standards are driven higher by consumer demands and new automation and technological advances, which will be presented at the show.

As part of our commitment to reducing our event carbon impact, and our journey to Net Zero we are excited to announce that we have purchased renewable electricity for over 90% of our event.

Our event use of electricity generated by fossil fuels, such as coal, has been a significant proportion of our event carbon impact. By switching to renewable electricity, which is generated by sustainable sources such as wind or solar, we eliminate the carbon impact from how we power our event. This makes a significant reduction to each of our event's carbon footprint.
