POWTEX 2024

Ausstellung – Koto-ku (Tokyo), Japan

Bearbeitet von am 12. Dez. 2023

"The 25th International Powder Technology Exhibition Tokyo"

This is an international exhibition of “powder technology” that makes, measures, and transports powders that are used in the production of chemicals, foods, pharmaceuticals, and mining.

The purpose of POWTEX® is development, dissemination, improvement and promotion of powder of process industry and engineering. POWTEX® have a reputation as the only exhibition in Japan which covers a wide range of recent information on powder technology and engineering. POWTEX® has been continuing to grow and now POWTEX® is held every year alternately in Tokyo and Osaka. Attractiveness of POWTEX® lies not only in the content-rich exhibition but also in various events held in conjunction with the exhibition. Examples of such events are as follows; autumn meeting of SPTJ (Society of Powder Technology , Japan), Powder Technology Forum and Symposium where results of research and studies by technical groups and others are presented, Industry-Government-Academia Linkage Fair where needs and seeds meet and Consultant Corner where visitors can consult experts about their technical problems.
