Premier Tech Chronos: Open-Mouth Bagging System for Free-Flowing Bulk Materials

Edited by on 25. Oct. 2023

The OML SERIES open-mouth bagging systems are designed for bagging free-flowing materials into open-mouth bags for applications between 5 and 50 kg per bag. The systems are ideal for bagging flakes and granules from the Food, Feed, Pet Food, Chemicals and Minerals industries.

The OML SERIES of bagging systems feature modular designs in three versions: compact open-mouth bagging system (OML-1080 SERIES, up to 800 bags per hour), high-speed open-mouth bagging system (OML-1120 SERIES, up to 1,200 bags per hour) and high-speed open-mouth bagging system for PE bags (OML-1120 FS SERIES, up to 1,200 bags per hour). Units can be supplied with either our gross or nett weighing systems for optimum system performance.
