Cablevey Conveyors Systems

Edited by on 25. Oct. 2023

What are your current breakage percentage rates? How much is that costing you? Want help? Tubular drag conveyors are the safe and reliable way to move friable (delicate) products.

Also known as a “tubular drag conveyor,” “cable conveyors,” “tube conveyors,” and “tubular belt conveyors,” such systems are designed to minimize batch separation and product degradation. Ideal uses include food, industrial, and consumer product manufacturing applications. For over 40 years, Cablevey Conveyors has been a world-wide leader in enclosed conveyor systems and technologies providing more than 30,000 systems in 65 countries for over 900 different types of products. Typical applications include coffee, cereal, nuts, beans, and pet food. Cablevey conveyor systems are used by Fortune 500 companies, top-tier food processors, and a host of industrial enterprises. The company offers enclosed tube conveyor systems in varying capacities including 2”, 4”, and 6” (50mm, 100mm, and 150mm) diameter systems. All systems can be custom fit for the customer's material handling needs.
