EMPACK

Trade Fair – Bern, Switzerland

Edited by on 23. Nov. 2023

"The unique Meeting Point of the Packaging Industry in Switzerland"

Experience the entire packaging part of the value chain at EMPACK , from the creative packaging development phase, to the technical packaging and filling process with packaging machines. Empack is the largest packaging exhibition in Switzerland. Here you will meet national decision makers who are interested in your innovations, products or services.

Whether at the exhibitors' stands, on the lecture stage or complementary on the online platform, EMPACK presents the latest products, trends and technologies for the packaging industry. At EMPACK, you make the most of your time and your marketing budget. The all-inclusive concept makes trade fair preparation easy and reduces your organisational effort for two concentrated days at the fair. The stand sizes per exhibitor are deliberately limited so that big players and SMEs can meet on an equal footing. This makes EMPACK a smart, focused trade fair that is attractive for visitors and exhibitors and, above all, delivers results.
