12. - 14. Nov. 2024

FILTECH 2024

Conference & Trade Fair – Köln, Germany

Edited by on 5. Dec. 2023

"The Platform for the Global Filtration Industry"

The innovative power in the dynamic field of filtration and separation is strong. Particularly in air filtration, fine dust values and gases that affect the climate, germs that are harmful to health, and other impacts are leading to ever new developments. But also for solids separation and solid-liquid separation there are always new developments with the striving for maximum efficiency and higher qualities.

FILTECH is the largest and most important filtration show world-wide. FILTECH 2024 will feature 460+ Exhibitors and a major international Conference. The innovative power in the field of filtration and separation is strong. Particularly in air filtration, fine dust values and gases that affect the climate, germs that are harmful to health, and other impacts are leading to ever new developments. But also for solids separation and solid-liquid separation there are always new developments with the striving for maximum efficiency and higher qualities. At the FILTECH Show you find targeted solutions for all filtration tasks – no matter what industry you are in.
