SAFEBELT® Closed Belt Conveyor

Edited by on 20. Dec. 2023

The SafeBelt System by Schulte Strathaus is suitable to convey bulk materials wherever it is necessary to circumvent obstacles, to save extra product transfer points and to transport the given material in a closed, protected, dust-free and saving manner.

The Advantages of the Closed Belt Conveyor at a Glance

- Weatherproof and dust-free transport of bulk material
- Easy circumvention of obstacles
- Eliminates product transfer points
- Low space requirement for the belt conveyor thanks to tight curve radii
- Simplified installation planning
- Simple relocation of the complete belt conveyor
