Bucket Elevator at Lafarge Zement

Edited by on 8. Dec. 2022

Spectacular residential and office buildings, tunnels and other infrastructure facilities - nothing can be built without cement. To produce cement for various applications in an economic way, Lafarge modernised the production facilities at its plant in the town of Wössingen, in the Baden region, Germany.

The modernisation included the existing belt bucket elevator to the raw mill. The intralogistics specialist BEUMER offered its innovative heavy-duty bucket elevators, permitting higher conveying capacity and longer service life. Thanks to this new technology, the existing bucket elevator could be easily altered.
