"Here is the Event Slogan"

The pandemic continues to disrupt the international events calendar for mechanical process engineering and analytics in 2022. Following in-depth consultation with the honorary sponsors, the Exhibition Advisory Board and many registered exhibitors, NürnbergMesse as organizer has now decided to postpone POWTECH 2022, the international Leading Trade Fair for Powder & Bulk Solids Processing and Analytics, by four weeks. It will now be held at the Exhibition Centre Nuremberg from 27 to 29 September 2022, in parallel with FACHPACK, the European Trade Fair for Packaging, Technology and Processing.

1. 360° View of mechanical Processing Technologies

A picture is worth a thousand words! So choose the 360° panoramic view of the entire process chain of processing technologies and discuss the leading-edge developments in analysis, size reduction, screening, mixing, conveying, dosing and compacting with the industry's top experts. Whether energy efficiency, sustainability, careful handling or process optimization, POWTECH 2022 as the world's undisputed number one puts the focus on innovations that will change mechanical processing technology.

2. Clear Focus on Powder, Granule and Bulk Solids technology

As an international exhibition, POWTECH reflects the trends in the industry through its exclusive focus on mechanical processing technologies - for the benefit of exhibitors and visitors. The compact event gives you easy access to the leading suppliers of basic processing technologies for powder and bulk solids, plant engineering and processing components, equipment for measurement, control and automation, products for nanoparticle technology, safety and environmental technology, plus services for mechanical processing technologies.

3. The perfect stage for work, dialogue and new contacts

POWTECH is far more than just a trade exhibition. It is a stage for working and discussing and the exchange of ideas between engineers prepares the ground for valuable new contacts and business relationships. But POWTECH is also the perfect stage for newcomers: As in the past years, young innovative companies show their new product and process developments in the "innovation made in Germany pavilion".

4. Inspiration for tomorrow's Processing Technologies

Meetings, deadlines and pressure of costs. Do you often have no scope for creativity during your daily work? POWTECH 2022 is guaranteed to inspire you with its presentation of pioneering innovations. The accompanying programme shows you the latest trends and product developments in the fields of explosion protection, easy-to-clean solutions or cleanrooms.

5. POWTECH - the Industry Barometer

Figures are worth a thousand words! 823 exhibitors from 29 countries, over 14,100 trade visitors; the figures for 2019 impressively show the importance of POWTECH for almost all branches of industry, and especially chemicals, pharmaceuticals, metal and food. All the forecasts indicate that value creation in the processing technology segment will carry on growing, so be there in 2022 when the crème de la crème discuss the latest product innovations.
