Dinnissen sets Industry Standard for Information Security with renewed ISO 27001 Certification

Edited by on 15. Dec. 2020
Sevenum, Netherlands –

In 2017, the machine builder obtained this integral certification for cyber security for the first time. In their own words, as the first and only machine builder in the Netherlands. ISO 27001 focuses on the availability, integrity, and confidentiality of data; an exceptional quality mark to have as a machine builder

"Together with our customers, we continuously innovate to make production processes more efficient and more profitable" says Wouter Kuijpers, Director Operations for Dinnissen Process Technology. "The role of Smart Industry, IoT and remote management is becoming increasingly important in this respect."

An example of such an innovation is the Dinnissen Productivity Platform. This platform enables Dinnissen customers to communicate with their machines and installations via the Cloud. This provides them with a simple and reliable way to gain insight into the output of their production processes at any time and location, including the service status and possible production interruptions. To

ensure secure connections between the customers' and Dinnissen's own networks, the Dinnissen Productivity Platform has been developed with an extreme focus on safety and reliability. With the ISO 27001 certification across the company's entire organization, Dinnissen offers assurance of secure information services and a safeguard from data leaks and hackers.

For efficient and reliable global Food Production

"We are proud that our customers, suppliers, partners and employees know they can count on Dinnissen. The world's biggest producers and best brands rely on us with their processes and with their data, we do everything we can to show that we deserve this trust on all fronts, including our information security." Mr. Kuijpers says. "That is why we have set the bar high for ourselves. We strive to be the most reliable business partner of all our customers and relations worldwide. After all, they play a crucial role in solving one of the biggest global challenges: the production of enough high-quality food for all people, pets, and livestock. We help them do this not only as efficiently as possible, but also in the most reliable way possible."

ISO 9001, ISO 14001, and ISO 45001

According to Dinnissen, their service complies with all legal requirements, covenants, and guidelines in the field of information security, quality, safety, health and environment. "However, to be a reliable partner for all our business relations, we're taking it one step further. In order to make this demonstrable, and to embed it within our organization, we have opted for integral certification of ISO 9001 (quality), ISO 14001 (environment), ISO 27001 (information security) and ISO 45001 (health and safety)."
