Raymond Bartlett Snow Chicago Area based Operations now all in one Location

Edited by on 21. Feb. 2018

The Chicago area based operations of RAYMOND BARTLETT SNOW are now located under one roof. The business office previously located in Warrenville, IL has relocated to establish the company's global headquarters at its applications development and R&D laboratory in Naperville, IL.

"Today marks a significant step forward in our strategy to combine the experienced resources of our company in order to provide an environment that creates better value for our customers," said Brent Beachy, President, RAYMOND BARTLETT SNOW. RAYMOND BARTLETT SNOW's testing laboratory contains the complete portfolio of Raymond® and Bartlett-Snow pilot-scale equipment for the size reduction, classification, and thermal processing of a wide variety of minerals, chemicals, food products, and other materials. The use of pilot-scale rather than "bench-scale" equipment generates results that are more accurately scalable to production size machines and that better demonstrate operational conditions likely to be experienced. A member of the ARVOS Group, RAYMOND BARTLETT SNOW is a leader in the design, manufacture and construction of size reduction, classification and thermal processing equipment. The ARVOS Group brands include Ljungström®, Schmidt'Sche® Schack® and Raymond® and Bartlett Snow.
