MoistTech Corp. and Weighing & Inspection announce Partnership in the Benelux Region

Edited by on 15. Dec. 2017

Sarasota (FL), United States -

MoistTech Corp and Belgium based company Weighing & Inspection have announced a strategic partnership to provide advanced moisture measurement capabilities for manufactured materials to customers in the Benelux region. The partnership will deliver a unique workflow capability focused on improving productivity and efficiency, streamlining operations for customers by implementing Near-Infrared (NIR) technology for moisture measurement and control.

The new workflow tools will prove indispensable to any professional manufacturing organization world-wide. An initial primary focus will be developing a joint marketing capability to demonstrate to customers in the Benelux how advanced moisture control technology can measurably drive quality and efficiency. "MoistTech Corp. is excited to partner with Weighing & Inspection to enhance our delivery of new features to the moisture measurement industry. This will enable us to become more efficient and reduce costs for a larger audience." said Adrian Fordham, President of MoistTech Corp. One of the leading companies in moisture measurement and coating thickness, MoistTech Corp. is supported by the original manufacturers of Near-Infrared (NIR) technology in the industrial moisture industry, manufacturing a range of on-line sensors and at-line instruments for moisture measurement and real-time moisture process control for

numerous applications. Insensitive to material variations such as particle size, material height and color, our moisture sensors provide continuous, reliable readings with zero maintenance. There is a one-time calibration with a non-drift optical design allowing operational personnel to confidently make immediate process adjustments based on real-time measurements. “By partnering with Weighing & Inspection, MoistTech Corp. is helping to improve workflow the world over,” said John Fordham, Managing Director, MoistTech Corp. “Combining our technology with Weighing & Inspection’s powerful and far-reaching workflow means that together we can extend the reach of our most advanced technology.” Johan Bauwens, owner and General Manager of Weighing & Inspection, believes that the cooperation with MoistTech is an absolute added value and is thrilled to be working in partnership with the global leader in NIR technology. “Working together with such a high-level partner with such huge domain-specific knowledge is a delight and will definitely increase our position in the market. The massive experience that MoistTech has, combined with their excellent support, will, without any doubt, lead to a successful and fruitful long-term relationship”.
