50tph C&D Waste Recycling Wash Plant in Northern Ireland

Edited by on 4. Jul. 2023

Skipway Waste Management in Lisburn, has commissioned the first trommel fines plant in Northern Ireland in a bid to push the boundaries in sustainable innovation. The recycling system incorporates a number of our innovative products, including: AggMax™ modular logwasher, EvoWash™ sand wash plant with Counter Flow Classification Unit (CFCU), AquaCycle™ thickener and static screens, operating at a rate of 50tph.

Designed and engineered by industry experts CDE, the new 50tph plant is situated at Skipway's site outside Lisburn, County Antrim. The completed plant will significantly enhance the company's current operations and contribute to a major improvement to the sustainability of the business.

Innovative solutions devised by CDE have equipped Skipway with the technology to advance the circular economy in Northern Ireland with this unique trommel fines recycling plant.
