TRACKSIDE CAR SHAKEOUTS

MODEL THRD - Retractable Base for Added Clearance

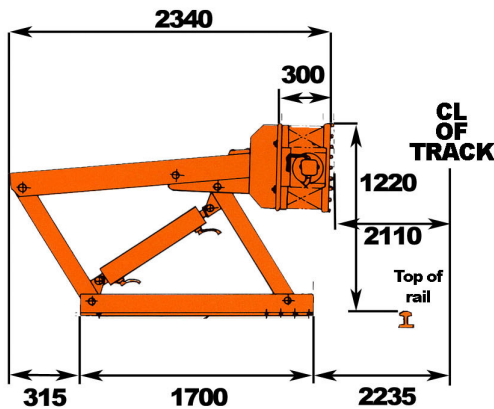

6.4mm Stroke; 2000RPM; 1,270 Kg net wgt.: 1450 Kg ship Wgt

Locate to maintain 900 mm maximum from base line to bottom sill of highest hopper car (fully loaded)

MODEL THFB - Fixed base Model

6.4mm Stroke; 2000RPM; 1,225 Kg net wgt.: 13,15 Kg ship Wgt

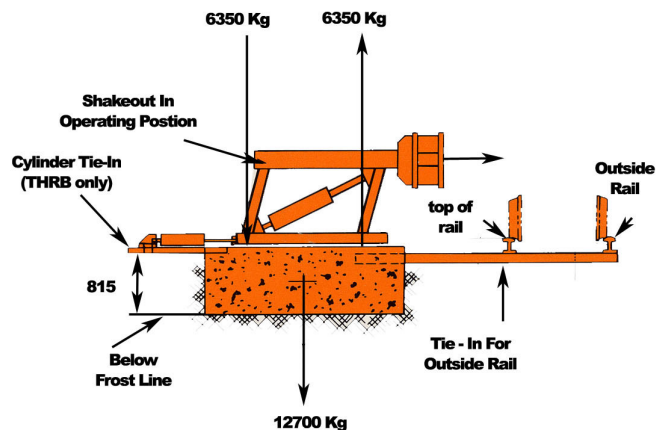

OPERATIONAL ADVANTAGES

- * Faster positioning against the car (50 Seconds or less after car is spotted).
- * One standard unit unloads both hopper and covered hopper cars.
- * Transmits more vibration energy to the car for faster unloading.
- * Uses Hydraulic power > No belts to loosen or break.

SAFETY FEATURES

- * No overhead cranes.
- * No heavy weights hung on top or side of car.
- * No Manual labor required to attach the Hewitt-Robins TRACKSIDE shakeout. Simply push the control valve to position the vibrator.
