

Today is indeed a Red Letter day in the history of Frigate.

Frigate is today officially registered as a full fledged Private Limited Company as per the Law of Govt. of India and today itself we signed a contract with **Xewell Cimenteries (Switzerland)**.

The delegation from Xewell Cimenteries comprised of **Dr. Mapathe Ndiaye and Mr. Cheikh Ndiaye**.

The plant capacity shall be such so to allow immediate establishment of a 1*100 TPD plant allowing to eventually expand up to 3*100 TPD production levels. A model of the plant was presented to Xewell Cimenterie

The contract envisages complete consultancy service to Xewell for finalizing the capacity of a mini cement plant (based on VSK technology) and identifying potential vendors (equipment suppliers) from India. The contract signing took place at the lush green gardens of the Intercontinental Eros (Nehru Place, new Delhi, India).

One very important aspect of this contract is the strong recommendation given by **PEG S.A, Switzerland** (A World renowned Cement Consultancy Company) to Xewell Cimenterie to enter into a direct contract with Frigate.
