GAME Engineering Ltd become a distributor for SCE Bins

GAME Engineering have recently been appointed distributors for the specialist bin supplier SCE, Silo Construction Engineering Limited of Belgium, to bring SCE's range of single and twin skin bins to the market in the United Kingdom and throughout Ireland.

Koen Verbrugge, Sales Engineer at SCE commented 'SCE was so delighted with the collaboration and experience of the staff of GAME Engineering that forming the distributorship was only a logic step.'

During GAME Engineering's recent working relationship on the construction of finished product blending bins for Wagg Foods, they were most impressed by the people and service provided. So much so that GAME Engineering plan to bring this successful working partnership to the advantage of new customers looking for turn key bin installation package.

Working closely with SCE and with other sub contractors, GAME Engineering can offer a design and build service for twin and single skin bins including erection, installation of conveyors, feeders and other process machinery. Civil engineering, electrical engineering and control can be provided within GAME Engineering's turnkey packages.

GAME Engineering Project Engineering Manager, Stewart Brown said, 'Over the years I have had experience of many bin suppliers, but these bins from SCE are the best I have seen. I feel that bringing SCE to the UK will be to the benefit of many future bin projects. We are currently developing many projects involving new bins and I look forward to working more closely with SCE in the future'.

For further information on GAME Engineering or to discuss a project and your requirements please contact Dave Burkitt, Contracts Director or Stewart Brown, Project Engineering Manager on 01522 868021. Alternatively, email dburkitt@game-engineering.com or visit www.game-engineering.com.

GAME Engineering Ltd the materials processing and engineering company located in Lincolnshire have always prided themselves on offering a professional and unbiased service to clients, encompassing their extensive experience and knowledge in the materials handling and processing industry.

The bespoke process solutions that GAME Engineering offer are due to them having no distribution agreements with equipment manufactures and every individual project they undertake, giving the client the best solution to suit their requirements and budget.

SCE who were established in 1988, offer over 20 years experience in the design and construction of silo bins for the storage of both granular and powdered products. SCE has numerous references throughout Europe in various industries such as animal feed, pet food, grains, flour, coffee, cocoa, peanuts, granulates, pellets, malt and seed. Visit www.sce.br for more information.
