DRY BULK LINERS

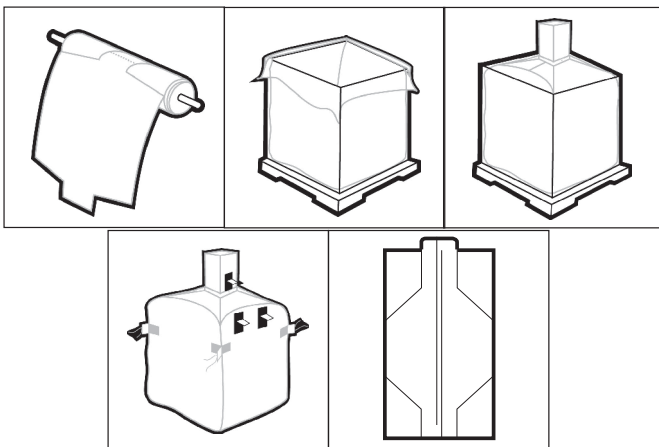

Dry Bulk Liners from Plascon Bulk Packaging are used in bulk bags, boxes and bins to provide a contaminant-free economical packaging system. A variety of specialty films are available to protect moisture and oxygen sensitive products, as well as anti-static and conductive films for applications requiring static control protection. The design of a Plascon Bulk Packaging Form-Fit Liner allows total filling capacity and complete discharge with minimal entrapment of valuable product.

STANDARD FEATURES

- **One-Piece Construction** - Minimizes seals, folds, pleats and handling during manufacturing process.
- **Custom Design** - Meets different sizing and strength requirements.
- **Form-Fit Design** - Minimize liner stress and increase product yield.
- **Single or Multi-Ply** - To meet the requirements of your product.
- **Barrier Films** - For customized product protection.
- **Rigid Fitments** - A wide variety available
- **Spouted Top and/or Bottom** - Simply eliminates contamination and confines odors.

PRODUCT RENDERINGS:

Plascon Bulk Packaging is a quality manufacturer with over 25 years experience in providing plastic liners to enhance the performance of a wide range of containers. All IBC liners are manufactured in our state-of-the-art, IMS and cGMP Certified facility. We take pride in working closely with our customers to custom-engineer a liner to meet their application and providing world-class service and delivery.

DRY BULK LINERS

FEATURES

CONTROLS CONTAMINATION

Spouted top virtually eliminates contamination and confines odors.

AUTOMATED CAPABILITIES

State of the art engineering matches liner to meet your production requirements.

TAPE TABS / LACES:

Used for securing your liners in place.

SIDE WINGS:

Available on any Form-Fit Liner

SPOUTS:

Flexible or Rigid
Heat sealing available
Various diameters and lengths offered

ADDITIONAL INFORMATION:

IMS Certified
Aseptic Packaging
FIBCA Member since 2006
FDA Approved Resins
High Temperature Applications
USP Class VI Certified for Pharmaceutical Applications
High-Barrier and Conductive Films
Class 10,000 Clean Room Manufacturing Capabilities

ABOUT PLASCON GROUP:

Plascon Bulk Packaging is part of the Plascon Group. Ask about our additional product lines which include:

Food Solutions - Flexible Packaging and Equipment for the Foodservice and Food Processing industries
Bioprocessing - High tech disposable containers used in biotechnology, pharmaceutical and research applications.
Work Programs - Turn-key programs providing jobs and revenue to community rehabilitation programs and correctional institutions.
Blown Films - LLDPE, HDPE, Blended and Biodegradable blown films for general packaging applications
