

The 9th China International Cement Industry Exhibition
2008' China International Cement Conference

Date 1-3 April, 2008

Exhibition Venue Shanghai Everbright Convention & Exhibition Center

Conference Venue Shanghai Everbright International Hotel

China International Cement Industry Exhibition and China International Cement Conference (CEMENTTECH) is a professional exhibition and conference covering all types of machineries, equipments and technologies within cement industry.

The CEMENTTECH 2007 included the machineries and equipments exhibition, the international conference, the technology conference as well as the meeting for 60 key support cement companies.

Over 200 multinational Companies, enterprises and investment groups from 25 countries and regions showcased their products, technologies and visited the exhibition.

The topic of the conference is construct a cement industry with sustainable development. More than 600 Chinese and foreign business leaders and politicians attended the conference to discuss how to narrow the gap between Chinese large enterprises and the world's leading standard by analyzing the development of large cement enterprise groups' path and management experience; how to increase cement production concentration and the regulation of markets and profits through merger and acquisition. Besides, how to promote the technologies for energy saving and emission reduction in order to realization the development and ecological harmony was also the important part of the conference.

2008 is an important year for China's cement industry which is confronted by acute energy and environment problems, enterprise expansion, fierce M&A activities and throat-cutting competition. What answers could cement enterprises and other relevant parties like technology and equipment providers make? With these questions in mind, we are expecting to meet you in Shanghai.

Welcome to the

9th China International Cement Industry Exhibition and the 2008 China International Cement Conference

Welcome to Shanghai

It's that time again to mark your calendar for next year's CEMENTTECH, which includes China International Cement Industry Exhibition and China International Cement Conference. The CEMENTTECH 2008 will take place in Shanghai, China, April 1-3, 2008.

The CEMENTTECH 2008 in Shanghai will offer interesting and educational tutorials as well as informative technical papers. The exhibit area has been extended 25% to provide even more participants and business opportunities. The conference will take place at the same place of the exhibition, conveniently located just a few miles from the Shanghai Hongqiao International Airport

Shanghai is undoubtedly one of the most beautiful and modernize places in China, rich in history, tradition and cuishine. There is an abundance of recreational possibilities in Shanghai, including the bund, jin mao building, oriental pearl TV tower, museums and numerous historical landmarks, just to mention a few. Shanghai is also a culinary pearl, with a high concentration of very fine restaurants located near the historical downtown area. Clorful leisure and recreational activities are symbols of a modern international metropolis, as well as a reflection of its great charm.

Please join us for one of the cement industry's largest and most important events in beautiful Shanghai , China. We look forward to seeing you April 1 to 3, 2008 at the CEMENTTECH 2008.

Sincerely,

2008 Committees

The 9th China International Cement Industry Exhibition

2008' China International Cement Conference

Date 1-3 April, 2008

Exhibition Venue Shanghai Everbright Convention & Exhibition Center

Conference Venue Shanghai Everbright International Hotel

Organizers

China Cement Association (CCA)

China Council for the Promotion of International Trade, Building Materials Sub-Council (CCPIT BM)

Supporter

China Federation of Building Materials Industries

Co-Organizers

China Building Materials Science and Education Committee
China Building Material Machinery Association
China Building Materials Academy
Shanghai Building Materials Association
China Concrete & Cement Products Association (CCCPA)
Tianjing Cement Industry Design & Research Institute
Nanjing Cement Industry Design & Research Institute
Chengdu Design & Research Institute of Building Materials Industry
Hefei Cement Design & Research Institute
Cement Manufacturers' Association of Singapore (CAS)
Indonesia Cement Association (ICA)
Hong Kong Cement Association
Korea Cement Industrial Association
Vietnam Cement Industrial Association

Overseas Partner

World Cement

The 9th China International Cement Industry Exhibition

Exhibiting Contents

- Mine Equipment & Engineering Machinery: crushers, dredging machine, drill, loader, bulldozer, crushing mill, gear reducer, belt conveyer, mineral tripping car etc.
- Grinding Machinery and relevant equipment: cylindrical mill machinery, vertical mill, high pressure grinding roll, tube mill, separator, various grinding medium, wear-resistant material, hear proof material
- Calcination and Cooling System: cyclone preheater, precalcination appliances, rotary kiln; clinker cooler.
- Transport equipment: various mechanical conveying system, pneumatic dispatch equipment and relative equipment.
- Filter and relevant appliances.
- Feeding and Metering equipment: feeder gate, feeding equipment, bin-hole, weighing batchbox, volumetric feeder, volume dosing unit.
- Waste gas treatment equipment: various dust collection equipment, conditioning tower, ventilating fan.
- Bulk Cement and Pack Cement equipment: bulk cement handling equipment, transportation, measuring equipment, warehouse equipment, cement
- Technological process control and automation technology: control system, detector technic, automatic instrument, NSP control, alternation speed controlled equipment, alternating frequency conversion equipment.
- Power Generation by waste heat facilities: waste heat boiler; set of generate electricity and relevant facility.
- Conveyer Device: Various conveyers, air conveyer and relevant devices.
- Storage and conveying mechanical system: storage, weigher; cleaning special device; various carriers, conveyer, chain etc. transport mechanism and their accessory apparatus
- Control systems: information system, central control system, automatic facility and application software
- Power Generation by waste heat facilities: waste heat boiler; set of generate electricity and relevant facility
- Facility lubrication and Grease oil: various hydraulic press, gear oil, compressor oil, lubricant grease and relative equipment.
- Auxiliary Accessory: dryer for raw material and fuel, mill for steel slag, waste incineration equipment, gearing device, jointing device, air compressor
- Logistic System: Bulk Cement, cement silo, port and boat, bulk loader, cement tank, automatic vehicle.
- Waster Material disposal and using technology and equipment.
- Various Cement admixtures
- Cement Corporation, engineering construction corporation, institution, association,

media

- Products and technology of refractory material for kiln
- Various security and safeguard products and equipment in Cement Factory
